

new ideas for OLD BUILDINGS

APD
KOZJAK
MARIBOR

- over 60 years of working as a non-profit organisation
- over 300 active members, 100 active sports climbers, teaching 45 children
 - started building its own bouldering wall 'STENCA' in the year 2000
 - 200 m2 bouldering area
 - training ground for some of the world-renowned sports climbers, mountaineers, world youth champions and Slovenian national climbing selector
- dialog between KC Pekarna and the city hall provided a new roof for the building
- without SPONSORS, their DONATIONS and a lot of self-initiative, this place would be just a long dark forgotten attic
- meaningful to invest into this location for the time being?
 - absence of fire safety, window, roof and wall insulation, proper electrical installations
- we have the need for expansion but are low on resources
